Monthly Traffic Statistics

BC Ferries Route 19

Nanaimo – Gabriola Island

These tables and graphs show the actual number of vehicles** and passengers boarding the ferry at Nanaimo Harbour or Gabriola Island and represent the number of one-way trips made.

*** Charts and Tables elsewhere may convert the actual number of vehicles to AEQs (automobile equivalents), reflecting the additional deck space occupied by overlength and commercial vehicles.*

To account for the fact that the length of each calendar month varies between 28 and 31 days, the graphs depict the DAILY average number of passengers and vehicles travelling, to even out the different lengths of each calendar month and offer a more accurate representation of seasonal variations. The graphs also take account of leap years.

Since the introduction of a two-vessel operation on this route in April 2022, vehicle traffic (and, to a lesser extent, passenger traffic) can be seen to have increased steadily and is now at the highest level ever recorded.
